Sacramento, CA 95814

Re: City of Montclair Support of Executive Order S-3-05 - Greenhouse Gas (GHG)  
Reduction Targets

Dear Governor Schwarzenegger:

On behalf of the City of Montclair, I would like to extend our appreciation for your support of GHG reduction targets for the State of California by issuance of Executive Order S-3-05. The City of Montclair agrees wholeheartedly and urges you and your administration to continue moving forward in implementing strategies to reduce GHG emissions to meet climate targets.

California will benefit from policies that support development and investment in clean, efficient energy and innovative technologies that will help our environment, create new jobs, and grow our economy.

The state is uniquely positioned to take the lead on policies to address global warming. California's policies should be based on a comprehensive analysis and robust public process, and show how the different strategies will lead to attainment of all the targets.

We must start now putting our smartest scientists and engineers to work to develop clean, safe, affordable energy and transportation solutions.

You have our support and we urge you to implement strategies to reduce GHG emissions to meet your climate targets.

Sincerely,

Paul M. Eaton, Mayor
